***Priority***

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Argentina on 26 September 2003. It is noted, however, that applicant has not filed a certified copy of the P030103519 application as required by 35 U.S.C. 119(b).

***Oath/Declaration***

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration has reviewed and understands the contents of the specification, **including the claims**, as amended by any amendment specifically referred to in the oath or declaration.

***Drawings***

3. The drawings were received on 3 August 2006. These drawings are approved.

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the spare inner wheel being permitted to engage the ground surface, as set forth in claim 36 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended

Art Unit: 3617

replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

5. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "42" has been used to designate both the unthreaded sector of the rim part 4 and an inner surface of the rim part 5 in Figure 25C.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the

Art Unit: 3617

changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

6. The disclosure is objected to because of the following informalities: The Abstract section should be removed from the last page of the substitute specification, given the fact that the abstract is provided on a separate sheet.

Appropriate correction is required.

### ***Claim Objections***

7. Claims 36-54 are objected to because of the following informalities: The term "rim" should be removed from the phrase "tire rim" throughout the claims, due to the fact that a "rim" is actually an element of a wheel assembly and not a tire.

It is believed that the phrase "the ground surface" should be replaced with the phrase --the inner surface of the tire-- in line 9 of claim 36 to clearly describe the invention, given the fact that as disclosed the spare inner wheel only contacts the inner surface of the tire and not the ground during a run-flat condition.

The period (.) following the phrase "claim 41" should be replaced with a comma (,) in claim 42 for grammatical clarity.

Appropriate correction is required.

***Allowable Subject Matter***

8. Claims 36-54 would be allowable if rewritten or amended to overcome the objection(s), set forth in this Office action.

***Response to Arguments***

9. Applicant's arguments filed 3 August 2006 have been fully considered but they are not persuasive. The Applicant argues that the original Declaration is not defective, however, the Applicant is directed to paragraph 2 above.

***Conclusion***

10. This application is in condition for allowance except for the following formal matters:

See paragraphs 1-7 above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
